Map View

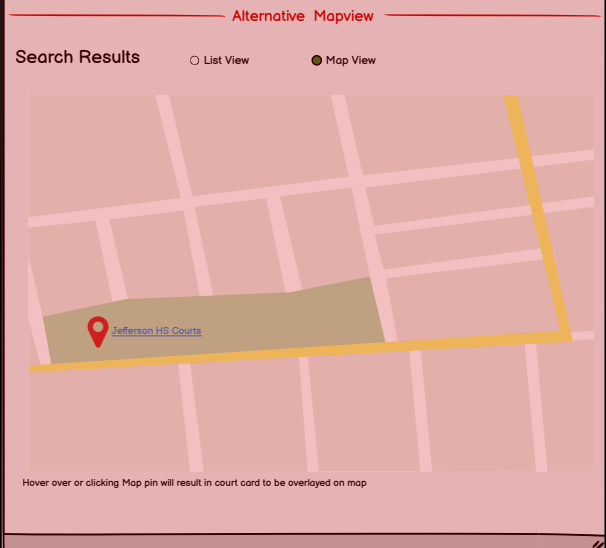

Facility Name	Address	Contact	Distance	# Courts	Notes
Jefferson HS Courts	1112 Stealth Avenue, San Diego, CA 92126	N/A	3.5mi	6 hard courts	<div>View</div>

View Courts Notes:

05/21/21

TennisCentral:
Courts are okay, 6 courts in a row with no divider between courts so the ball can easily end up in neighboring court.

Close

Clicking on the courts name will take you to the Courts detail page where there will be more detail information about the courts

Actions:
In "List view" the only action available is to allow a user view the Court Notes.

Actions:
Hovering over a map pin will show some detail as shown on list view. Clicking on Name of courts will take you to the Courts Detail page for that court.

Originally just had Card View option below...Replaced it with Courts Detail Page

NOTE: For MVP I could combine existing Courts-Facilities page and Courts-Facilities Detail page into a single Page that shows only a Card view BUT I want to use Maps in my app so that I can "work-in" at least one 3rd Party API.
One option is to combine the two pages and then just offer a "Map View" option (as seen on left) on the page that allows the user to switch between the CardView and a Map view.

https://

For MVP Courts page will not include this Courts/Facilities Detail page. There will only be a Courts/Facilities Page and this page will display Court/Facilities information using a Card for each Court/Facility (see bottom of Courts/Facilities Page) and it will also offer the ability to see courts in a Map View.
